EXPECT THEM TO SAY

- We paid their invoices 4 days late on average. Expect this to be raised — offer on-time payment in exchange for the asks above.
- Every figure is from our PO, GRN and invoice records; the PO numbers on page 2 let them check any line against their own copies.

WHERE THEY FALL SHORT

No area well below a typical supplier

A is the problem-statement formula verbatim: invoice_amount_billed – quantity_received $\times$ unit_price_quoted, summed over every purchase order. B values each return at this supplier's own median price for that material. Untraced returns (no supplier recorded) are split by a model validated on the returns that were recorded; they are shown for completeness and are not part of any credit claimed above. Relationship length is not used in scoring.
