WHAT WE ARE ASKING FOR

- 1

Short delivery. Issue a credit note of ₹14,23,221 for material billed but not delivered, and invoice on GRN-received quantity from the next order.

126 of 133 orders arrived short — 16.3 MT of 3,381.3 MT ordered (0.5% vs 0.8% for the rest of our panel).
- 2

Quality. Credit ₹14,56,722 for material returned by our customers, and send a mill test certificate with every MS Rods dispatch.

6 customer returns traced to you on our records (₹14,56,722). A further ~4 untraced returns are most likely yours (est. ₹8,31,468) — not claimed.
- 3

Price. Agree to quote at or below our panel median for each material — for GI Wire, your largest line, that is ₹86,517/MT.

Across 133 orders you averaged +5.7% above other suppliers for the same material and quarter (within price noise, so asked as a clause, not a refund).

EXPECT THEM TO SAY

- We paid their invoices 5 days late on average. Expect this to be raised — offer on-time payment in exchange for the asks above.
- Every figure is from our PO, GRN and invoice records; the PO numbers on page 2 let them check any line against their own copies.

WHERE THEY FALL SHORT

No area well below a typical supplier

A is the problem-statement formula verbatim: invoice_amount_billed – quantity_received $\times$ unit_price_quoted, summed over every purchase order. B values each return at this supplier's own median price for that material. Untraced returns (no supplier recorded) are split by a model validated on the returns that were recorded; they are shown for completeness and are not part of any credit claimed above. Relationship length is not used in scoring.
