WHAT WE ARE ASKING FOR

- 1

Short delivery. Issue a credit note of ₹1,19,34,606 for material billed but not delivered, and invoice on GRN-received quantity from the next order.

147 of 147 orders arrived short — 142.2 MT of 3,969.7 MT ordered (3.6% vs 0.7% for the rest of our panel).
- 2

Quality. Credit ₹1,72,70,271 for material rejected at our gate and returned by our customers, and send a mill test certificate with every SS Sheets dispatch.

96.8 MT rejected at inspection (₹82,28,767); 54 customer returns traced to you on our records (₹90,41,504). A further ~27 untraced returns are most likely yours (est. ₹59,02,341) — not claimed.
- 3

Delivery. Agree a late-delivery clause of 0.5% of order value per day, capped at 5%. Applied to the last three years it would have been worth ₹85,96,565.

Late on 147 of 147 orders, by 5.1 days on average (up to 8). Panel average: 1.8 days.

EXPECT THEM TO SAY

- We paid their invoices 6 days late on average. Expect this to be raised — offer on-time payment in exchange for the asks above.
- Every figure is from our PO, GRN and invoice records; the PO numbers on page 2 let them check any line against their own copies.
- Walk-away position: Viraj Profiles, Western Steel already supply HR Coils to us with a far better record.

WHERE THEY FALL SHORT

Short delivery · Late delivery · Quality

A is the problem-statement formula verbatim: invoice_amount_billed – quantity_received $\times$ unit_price_quoted, summed over every purchase order. B values each return at this supplier's own median price for that material. Untraced returns (no supplier recorded) are split by a model validated on the returns that were recorded; they are shown for completeness and are not part of any credit claimed above. Relationship length is not used in scoring.
